# Breakout Group 1
Regions 1, 2, 3, and 7

In Browsing/Maintain we would like to be able to enter a date range or reporting organization.   26

Bulletin board for ALL problems reported to the help desk   18

Raw data report that can be customized   17   Sean Fitzsimmons

We should be able to pull a batch file of data in "Correct" It can take weeks to resolve problems, meanwhile the data just hangs around   11

Many blank pages in QL report   10

Raw data (All Raw data) accessible through Discoverer   10   Bern Johnson

Notify us before changes are going to be made. Like *.gz files	9	
Make sure Historic raw data will be available	8	
Have AQS recognize that precision data has been rounded and not expect an exact match with actual data	8	Bern Johnson
NCC should test all new software outside of firewall, or outside of their office	7	
Data dictionary should spell out acronyms	7	
Data is converted in Scan Report to Standard values making it difficult to compare the input values with values ready to be posted.	5	
Short description of a report when pop up selection is made	5	

On retrieval selection when you arrow or mouse down, it goes to a default field not the selected field 4

Improvement in general at help desk, Response time, refer to the right person, questions not answered 4

Message to bottom of screen to last longer 3

Ability to change sort order on retrievals 3

P&A, monitor and site data loads without giving us a chance to see it. We would like a report with details 3

Current status of database should be on login page 2

A no error message on the statistical evaluation report if there are no errors 2

Ability to save Queries 2

Method Code *.pdf should be broken up so it would be easier to open up.

Cannot create test records, would like to create a batch of test records

Be able to select agency on retrievals not have to use slow pull-down menu

P&A retrievals have the option of selecting only Precision or Accuracy

Option of sorting or retrieving by error codes

P&A retrievals still not calculating correctly, decimal point problem

Action items should not be in menu bar
